

Software Requirements Specification (SRS)

Website Development & Online Reputation Management

Client Brand: McRAYGOR **Current Legal Entity:** McRAYGOR Mechanicals Infrastructure (Sole Proprietorship, operational since 2019) **Industry:** Sewer Cleaning Machines, Vacuum Trucks, Municipal & Industrial Waste Handling Equipment

1. Background & Context

The brand name **McRAYGOR** has been active in the market since 2007 and has strong recall among municipal bodies, contractors, and export customers.

Earlier, the brand operated under **McRAYGOR Mechanicals Pvt. Ltd.**, which was later shut down due to business losses and legal issues. As a result, some outdated and negative information exists online related to the old private limited company.

Since 2019, the business has been operating as **McRAYGOR Mechanicals Infrastructure**, a new and independent sole proprietorship entity with no legal or operational linkage to the previous company, apart from the brand name.

The brand name has been retained deliberately due to: - Strong legacy recall - Existing customer trust - Long-standing presence in municipal and export markets

2. Core Objectives

2.1 Primary Objectives

- Build **two high-quality, modern websites** (Indian & Global)
- Establish **strong online brand credibility** for the current entity
- Suppress, de-rank, and overshadow outdated/negative content related to the old company
- Achieve **top search rankings in India** for sewer cleaning machines and related keywords
- Position McRAYGOR as a **premium, technology-driven manufacturer**

2.2 Highest Priority

Online Reputation Management (ORM) is the top priority of this project.

3. Website Architecture Strategy (Before Development)

3.1 Website Split Strategy

Two distinct user experiences are required:

- **IW (Indian Website)** – For Indian buyers, municipalities, contractors
- **GW (Global Website)** – For export clients, international partners

3.2 Domain Strategy (To be advised & finalized)

Acceptable options:

Option A (Preferred): - www.mcraygor.in → Indian Website (IW) - www.mcraygor.com → Global Website (GW)

Option B: - india.mcraygor.com → IW - www.mcraygor.com → GW

Option C: - www.mcraygor.com → Global - global.mcraygor.com + india.mcraygor.com

The software company must: - Advise the **best SEO + ORM-safe architecture** - Ensure old negative URLs are pushed down by stronger new pages

4. Global Navigation Requirement

Both websites must include a **clear header switch**, for example:

- On IW: "Visit Our Global Website"
- On GW: "Visit India Website"

This must be: - Visible but not intrusive - UX-optimized - Fast loading

5. UX / UI Philosophy (Very Critical)

McRAYGOR places **extreme importance on UX and UI quality**.

5.1 Design Expectations

- Premium industrial look (not template-like)
- Clean, modern, minimal
- Strong visual hierarchy
- Smooth micro-interactions
- Fast loading even on low bandwidth

5.2 Indian User Behaviour (IW Specific)

- Indian users **prefer visuals over long text**
 - More emphasis on:
 - High-quality machine photos
 - Real project images
 - Videos & animations
 - Text should be:
 - Short
 - Scannable
 - SEO-optimized
-

6. SEO Requirements (IW Focused)

6.1 Keyword Strategy

We will provide a detailed keyword list, including but not limited to: - Sewer cleaning machine - Super sucker machine - IVC super sucker - Jetting cum suction machine - Vacuum truck - Sewer jetting machine - Municipal cleaning equipment

The agency must: - Create **dedicated SEO landing pages** for each keyword cluster - Avoid keyword stuffing - Use schema, internal linking, and structured content

6.2 Ranking Goals

- Rank on **Page 1 in India** for core sewer cleaning keywords
 - Outrank competitors and outdated brand references
-

7. Online Reputation Management (ORM) – Critical Scope

7.1 Objectives

- Suppress negative and outdated references of McRAYGOR Mechanicals Pvt. Ltd.
- Promote the current entity: McRAYGOR Mechanicals Infrastructure
- Build strong positive brand signals across platforms

7.2 ORM Activities Required

7.2.1 Google Presence

- Identify and address **old Google Business Profiles** of the Pvt. Ltd. entity
- Request removal / marking as permanently closed where applicable
- Create and optimize a **new Google Business Profile** for the current entity

7.2.2 Reviews & Brand Signals

- Generate **genuine, high-quality positive reviews**
- Focus on:
 - Product quality
 - After-sales service
 - Municipal project execution

(Fake or low-quality reviews are strictly unacceptable)

7.2.3 Content Suppression Strategy

- Publish:
 - Authority blog articles
 - Case studies
 - Press-style features
 - Industry content
 - Ensure these pages rank higher than old negative URLs
-

8. Content Requirements

8.1 Mandatory Pages

- About McRAYGOR (Clear mention of 2019 re-establishment)
- Products (Individual pages for each machine)
- Applications (Municipal, Industrial, Oil & Gas, etc.)
- Projects / Case Studies
- Gallery (Very important)
- Videos
- Contact

8.2 Messaging Guidelines

- No reference to old legal entity issues
 - Focus on:
 - Engineering capability
 - Manufacturing strength
 - Experience & legacy
 - Innovation & reliability
-

9. Technical Requirements

- Mobile-first design
- Core Web Vitals optimized
- Secure (HTTPS)

- SEO-friendly URL structure
 - Easy CMS for future updates
 - Multi-language ready (future)
-

9A. Ownership, Intellectual Property & Control (Mandatory)

This project is a **purchase of a digital asset**, not a rental or subscription-based deployment.

The software company must clearly agree that:

- Complete **source code ownership** (frontend, backend, CMS, themes, custom plugins/modules) is transferred to **McRAYGOR Mechanicals Infrastructure** upon project completion.
 - All **UI/UX design files** (Figma / XD / equivalent) are handed over.
 - All **website content** (text, media, SEO pages) is original and becomes the exclusive property of McRAYGOR.
 - Domain ownership will remain with McRAYGOR at all times.
 - Hosting, CMS, Analytics, Search Console, and CRM admin access must be provided.
 - No critical dependency on agency-owned licenses is allowed.
 - McRAYGOR has full freedom to modify, migrate, or appoint a new agency at any time without restriction.
-

9B. Detailed UI / UX Functional Requirements

9B.1 Global Interaction & Accessibility

- Floating **WhatsApp contact button** with subtle animated / flowing WhatsApp icon
- Click-to-chat functionality using official WhatsApp API / deep link
- Primary contact number and email must be **clearly visible** (header + footer)

9B.2 Contact Form Requirements

- Minimal form fields only:
 - Name
 - Email
 - Message
- Intelligent placeholders suggesting use cases (e.g. "Machine enquiry / Tender / Service requirement")
- No CAPTCHA friction unless absolutely required
- Fast submission with confirmation feedback

9B.3 Responsiveness & Stability

- Website must be **fully responsive** across:
 - Mobile phones
 - Tablets

- Laptops
 - Large desktop screens
 - Zero layout breakage, overlap, or visual glitches at any resolution
 - Tested on major browsers (Chrome, Safari, Edge, Firefox)
-

9C. Branding & Footer Policy

- No third-party branding text such as:
 - “Powered by”
 - “Developed by”
 - “Engineered by”

Footer text must read:

© McRAYGOR Mechanicals Infrastructure. All Rights Reserved.

9D. Homepage – Advanced Visual & Content Blocks

9D.1 Hero Section (Top of Website)

- Full-width **image slider** (multiple high-resolution machine images)
- Overlay:
 - Brief company introduction
 - Brand positioning statement
- Optimized for fast loading despite visual richness

9D.2 Product Navigation (Mega Dropdown)

- Large, square-style **mega dropdown menus**
- No narrow or indented dropdowns
- Clear product categorization:
 - Liquid Waste Handling Machines
 - Solid Waste Handling Machines
 - Industrial Vacuum Cleaning Machines
 - Special Purpose Equipment
- Sober, professional styling with easy scannability

9D.3 Clientele Showcase

- Slow-floating, dynamic **two-column marquee-style section**
- Displays logos / names of esteemed clientele
- Smooth motion (non-distracting)

9D.4 Company Profile Download

- Clear CTA button:
 - “Download Company Profile”
 - Downloads latest **company profile PDF**
 - CMS/CRM-managed file update
-

9E. Quantifying Excellence Section (Dynamic Data)

Section Title:

Quantifying Excellence: Operational & Manufacturing Highlights

Includes dynamic (CMS/CRM-updatable) metrics such as: - Number of tenders executed - Number of projects completed - Number of machines manufactured - Number of countries served

Note: - Data is **not real-time** but admin-updatable - Designed for credibility and impact

9F. Brand Philosophy & Tagline Integration

The website must consistently communicate McRAYGOR’s commitment to: - Environmental protection - Safety and dignity of sanitation workers - Mechanization of cleaning operations - Eliminating manual scavenging through technology

Suggested thematic positioning: - Clean cities - Safe workers - Mechanized sanitation

This philosophy should be reflected visually and textually across the site.

10. Deliverables Expected from Software Company

1. Website architecture & domain strategy recommendation
 2. UI/UX wireframes (IW & GW separately)
 3. Full website development
 4. SEO execution plan
 5. ORM execution plan with timelines
 6. Monthly ranking & reputation reports
-

11. Success Metrics

- Page 1 rankings for target keywords
- Increased inbound enquiries

- Positive brand perception online
 - Old negative content pushed beyond visibility
-

12. Confidentiality

All information related to brand history, ORM, and legal background must be treated as **strictly confidential**.
